Payment required within 2 days from sample collection. Referring practitioner required - results sent only to referring practitioner.)		
	Comprehensive analysis of LDL- cholesterol fractions & subfractions. (3 month follow up test recommended to monitor effectiveness of treatment intervention).	R 950.00

Instructions for sample collection and transportation to MDS Laboratory

- Please ensure all details above have been completed, a test selection has been made and the 'Terms and Conditions of Testing' have been signed by the client (see overleaf/page 2).
- For LipidPro tests, MDS requires a total cholesterol result prior to testing, performed on the same day as the LipidPro sample collection.** The result must be submitted to MDS with the LipidPro sample or emailed to nutrition@wellpro.co.za with client details. The total cholesterol test can be done at a clinic or laboratory and will be done at the **client's own cost**
- For ImuPro, IgE and LipidPro tests, please take a 5ml serum sample (*Gel/SST Plain tube*) of blood after the client has fasted for the recommended number of hours (see above).
- Spin the sample down if there is facility to do so. Please place the tube in the into sample bag and contact MDS laboratory (031 267 7000) to arrange a courier to collect the sample. **Please ensure MDS receives the sample within 24 hours of sample collection.** To

ensure that samples arrive at the laboratory the following day please only collect samples on a day before a working day and send the samples overnight by courier. Place the sample in the fridge until collection. Transport at room temperature but keep samples cool overnight.

Terms and Conditions of Testing
<p>General: I consent to tests requested, guarantee payment and verify that all information is correct. Testing will not be started without receiving payment. Payment for the test requested will be taken as consent for testing to be performed on the sample submitted to MDS.</p>
<p>For ImuPro testing: The sample is invalid for processing after 1 month therefore payment or upgrade requests are required within 1 month.</p> <p>Limitations of the method The results obtained must always be interpreted in combination with the complete clinical picture and dietary changes must be made in consultation with a relevant dietician or nutritional expert. The IgG levels determined by using this test system make it possible to infer information about the degree of sensitization of the patient to the food antigens or mixtures tested. They cannot be used to derive a relationship between the determined IgG concentration and occurrence of serious clinical symptoms. False positive test results may be produced by cross-reactivity of the antigens being tested with the epitopes of other antigens.</p> <p>Certain allergy associations do not support IgG testing as a means to diagnose food hypersensitivities. However, a growing number of publications and a large amount of anecdotal evidence support that elimination diets based on circulating IgG antibodies result in improved symptoms in patient. A subset of these peer reviewed published papers are found on our website www.wellpro.co.za.</p>
<p>For LipidPro testing:</p> <ol style="list-style-type: none"> I accept that my LipidPro results will not be sent to me directly, rather to my referring health practitioner (ISO15189:2012:5.9.1 Release of results). MDS requires a total cholesterol result prior to testing, performed on the same day as the LipidPro sample collection. The result must be submitted to MDS with the LipidPro sample or emailed to nutrition@wellpro.co.za with client details. The total cholesterol test can be done at a clinic or laboratory and will be done at the client's own cost The sample is invalid for processing after 7 days, therefore upfront payment directly to MDS is required prior to, or within 2 days of, sample collection.
<p>Signature: Date:</p>

Disclaimer: In the event that Molecular Diagnostic Services (Pty) Ltd (MDS) returns a verifiable erroneous result for a particular sample, or if negligence is proven on the part of MDS, any claim against MDS is limited to the amount paid or to be paid to perform the test in question. In no event shall MDS be liable for direct, indirect, incidental, consequential, special or other damages of any nature even if MDS has been advised of the possibility of such damage. Should any details on this form be incorrect then they must be brought to the attention of MDS.
