ImuPro Complete (270 individual foods tested plus IgG antibodies detected against <i>Candida albicans</i>)	R 5150.00

P.T.O. for sample collection and transportation instructions.

Limitations of the method

The results obtained must always be interpreted in combination with the complete clinical picture and dietary changes must be made in consultation with a relevant dietician or nutritional expert. The IgG levels determined by using this test system make it possible to infer information about the degree of sensitization of the patient to the food antigens or mixtures tested. They cannot be used to derive a relationship between the determined IgG concentration and occurrence of serious clinical symptoms. False positive test results may be produced by cross-reactivity of the antigens being tested with the epitopes of other antigens.

Certain allergy associations do not support IgG testing as a means to diagnose food hypersensitivities. However, a growing number of publications and a large amount of anecdotal evidence support that elimination diets based on circulating IgG antibodies result in improved symptoms in patient. A subset of these peer reviewed published papers are found on our website www.wellpro.co.za.

Informed consent for testing

While it is in my best interest to have a healthcare practitioner interpret and explain my results to me, I understand that should I wish to receive my results directly, I acknowledge that MDS cannot be held liable for any pain, discomfort, confusion or distress which the release of the test results to me, may cause. Furthermore, whilst I am legally entitled to my own information, I understand that it might not necessarily be in my best interest to be exposed to information of which I may have limited knowledge and understanding and which may be detrimental to my well-being if not explained fully and in a manner which I will understand, by my own trusted healthcare practitioner.

As I have made an informed decision to self-refer to MDS for testing, by giving me the test results, MDS waives liability for any distress or confusion which I may experience as a result of receiving the test result directly from MDS without consulting with a healthcare practitioner. I acknowledge that MDS strongly recommends that I be encouraged to visit my healthcare practitioner as soon as possible after receiving my results and that I carry the onus to make an appointment with my healthcare practitioner to have my test results interpreted.

I also agree to receive marketing material from WellPro and understand I may opt out at any time:

Yes

No

Client to sign acceptance of limitations of the method and informed consent before sample is sent to MDS:

Signed: _____

Date: _____

MDS REF No

Payment details: Per credit card, bank deposit or electronic transfer with name reference. *Please **DO NOT** pay any 3rd party. If you would prefer to give us your credit card details telephonically, then please contact the office on 031 267 7000.* Payment for the test requested will be taken as consent for testing to be performed on the sample submitted to MDS.

Note: The sample is invalid for processing after 1 month therefore payment or upgrade requests are required within 1 month. *Please note that the test will not be started without payment having been made.*

ImuPro sample collection and transportation to MDS Laboratory

- **No payment for the ImuPro test is to be made to, or collected by, the laboratory/facility taking the ImuPro sample – clients will pay MDS directly for the test.**
- 2 – 4 hour fast prior to sample collection.
- A 5ml serum sample (Gel/SST Plain tube) of blood is required for this test and the sample sent to the MDS laboratory for analysis.
- Once the blood sample has been collected please ensure that the client's name and date of birth is written on the tube.
- Please place the blood sample into a sample collection bag with the completed Food IgG Test Requisition Form.
- Samples collected at Ampath Laboratory (in KZN) will be sent to Ampath's Sendaway department after which MDS will receive the sample.
- For samples collected at other private facilities, place the sample in the fridge and contact us to arrange courier to collect the sample.
- Blood samples should be couriered to MDS laboratory within 3 to 7 days at room temperature.
- MDS will process the sample within 10 to 14 working days of receiving the sample and payment.

Please note that the health practitioner/phlebotomist taking the blood sample must safely discard used needles. Under no circumstance must a used needle be returned to MDS with the blood sample.

Should you require any further assistance, please contact MDS on 031 267 7000.
